### Kartell by Laufen

Designer and architect Ferruccio Laviani steered the newest chapter of the iconic **Kartell by Laufen** collection with the creation of the beauTwash vanity. Using the capital letter “T” as a graphic gesture, the vanity is offered in a range of bold and deep colours and can be configured with a Vitreum steel washbasin.

### Balcoon

An expressive collection by Patricia Urquiola for **Duravit**, Balcoon combines familiar geometric shapes with nature-inspired finishes and a palette of warm tones to bring architectural elegance to the bathroom. The modular vanities — some with asymmetrical layouts — feature fluted drawer fronts and can be composed with an integrated back panel, open storage shelves and more.

### Carsico

A sculptural masterpiece, Carsico by Paolo Ulian for **Antoniolupi** derives its distinct appearance from the usually invisible core drill holes inside marble sinks. Here, those technical elements are brought front and centre through a process of material subtraction. Each one is hand-finished by master craftspeople and highlights the quality of the natural stone.

### Flair

Intended to complement daily life, Flair from **Scavolini** employs rounded corners, tactile textures and exacting symmetry to deliver a system with a welcoming expression and adaptable functionality. A curated selection of materials and finishes (including matte and glossy lacquers and natural wood veneers) and a refreshing colour palette mean it can be incorporated into a variety of interior design styles.
