## FITNESS BATHROOM

THE GYM SPACE RECONCEPTUALIZES THE COMPONENTS OF A LUXURY BATHROOM TO SKILLFULLY INCORPORATE A WALL-MOUNTED FRAME DEDICATED TO PHYSICAL EXERCISE. IT MAXIMIZES SPACE, WHILE PROMOTING EVERYDAY WELLNESS.

Designed by innovator Mattia Pareschi, *The Gym Space* brings wellness to the most sacred place in your home in one convenient, space-saving location: the bathroom! The heart of the project lies in the reinterpretation of Gymnastics Wall Bars, with the entire range revolving specifically around this piece of gym equipment, used as the base onto which additional sports equipment may be applied — including a bench and a traction bar. It also works to secure the bathroom furnishing accessories, such as lights, shelves, storage elements and mirrors. Designed to work from the most lavish homes and penthouses to the most compact condos and apartments, it offers endless configuration possibilities, blending contemporary styling with functionality; [Scavolini.com](https://www.scavolini.com) ●
