

# SCAVOLINI

L'impegno e la ricerca dell'azienda trovano una delle massime espressioni in **Dandy Plus** (design Fabio Novembre), prima cucina in assoluto che adotta Alexa, e per la quale l'azienda si è affidata a due partner eccellenti: Amazon e BTicino. Grazie alle funzionalità di Alexa, integrata nella Task Bar del modello, e grazie alla componente Living Now di BTicino, Dandy Plus esalta l'esperienza e la forza innovativa di Scavolini e Amazon dando vita a una soluzione inedita. Dandy Plus è un concept innovativo anche nelle modalità di acquisto: per il mercato italiano è progettabile online in base alle configurazioni disponibili su [scavolini.com](http://scavolini.com). Nelle foto: Dandy Plus con ante Bianco Puro abbinata a maniglie in plastica riciclata texturizzata a sfere e a dettagli Rosso Corallo. Le strutture a ponte che racchiudono le colonne e la zona operativa sono in Grey Plus.

PER DANDY PLUS,  
L'APPROCCIO È STATO IMMAGINARE  
UNA CUCINA CAPACE DI PARLARE  
A UN TARGET GIOVANE, CHE VUOLE  
VIVERE LA CASA IN MODO LEGGERO  
E INNOVATIVO. UNA CUCINA QUINDI  
'PARLANTE' E CONNESSA. UN CONCETTO  
POP, FORTE E GIOCOLO A PARTIRE  
DALL'IMPATTO ESTETICO

FABIO NOVEMBRE

## VENETA CUCINE

**Start-Time** is one of the systems that best expresses Veneta Cucine's desire to develop ideas that are big on design content, but affordable, in which concepts of facilitation, simplification and practicality are applied in a way that goes beyond traditional modularity. The collection comes in a wide range of colours, wood finishes and versatile combinations, in order to satisfy the requirements of consumers who care about small details, but also about their budget. Start-Time Presa offers a choice of opening systems: a handle, a fingerrip groove on the edge of the door, a flat groove and a small handle set into the edge; the 'J' groove can be combined with the Pro profile on the edge of the door. The photos show the fingerrip on the edge of the door with the same Bronze Finish as the toe-kick. The base and tall units are in Light Graffiato, the wall units in Rustik Walnut, the worktop in London Grey Fenix.

*"Start-Time is a fluid system that will adapt to consumer demands, and in which different tastes and representations co-exist. The new colours, materials and opening systems make this a universal product".*  
Daniela Archiutti

## SCAVOLINI

The company's commitment to researching new designs finds one of its greatest expressions in **Dandy Plus** (design Fabio Novembre), the first kitchen ever to adopt Amazon's Alexa, and for which the company drew on the services of two high-ranking partners: Amazon itself, and BTicino. The Alexa smart speaker is integrated into the model's Task Bar, and thanks to the BTicino Living Now component, Dandy Plus enhances the experience and sheer innovative power of Scavolini and Amazon, giving rise to a whole new kitchen concept. In the photos: Dandy Plus with Pure White front combined with handles in sphere-texture recycled plastic and with Coral Red details. The bridge structures that close off the tall units and the work area are Grey Plus.

*"For Dandy Plus, the approach was one of imagining a kitchen that would appeal to young people who want to take a light, innovative approach to home living. A 'talking', connected kitchen, a powerful yet playful pop concept, that makes a striking aesthetic statement".*  
Fabio Novembre
