

SCAVOLINI

Dalla cucina si estende al living con mobili coordinati: è **Jeometrica**, firmata da **Luca Nichetto**. L'anta a telaio da 29 mm di spessore - con profili in alluminio disponibili Antracite e Titanio - caratterizza anche questa nuova soluzione che arreda il magnifico spazio architettonico. Filo conduttore tra arredo cucina e il mobili living sono le stesse ante in vetro lucido Tortora e telaio Antracite e lo schienale grigio con mensole. **L'isola è valorizzata dalla base a giorno in Decorativo Anise e si completa con lo snack in impiallacciato Rovere Nabuk** (sp. 6 cm). Tutti i top sono in Gres Abitum Nero Rigato (spesso 1,2 cm); le colonne dietro l'isola sono in Impiallacciato Rovere Malto.

CUCINE LUBE

Immagina offers a collection of new finishes and materials, and is characterised by the 22mm-thick front. In the kitchen idea presented here, Immagina **takes up the entire space** with an island kitchen, tall units and, in the living room, a 406-cm TV cabinet, bright panelling and wall-mounted elements. Iola and the living area are coordinated with each other in the combination of Stone Effect Juta Stone Melamine and the Caravella Light Ribbed Laminate, which also covers the tall units, enhanced by ribbed glass fronts and the pull-out 30 column unit in PET Meal Brown. The special 408cm-long island has an open front with illuminated shelves and an upper bridge-style structure, an Okite Calacatta Apuano worktop, a snack bar in Brass laminate and Kasia stools.

SCAVOLINI

Jeometric, designed by **Luca Nichetto**, extends from the kitchen to the living area with matching furniture. The 29mm-thick framed front - with aluminium profiles available in Anthracite and Titanium - also characterises this kitchen solution. The kitchen and living area furniture are unified by the fronts in Tortora polished glass with Anthracite frame and grey back panel with shelves. The island is enhanced by the open base unit in Decorativo Anise and is completed by the snack bar in Nabuk Oak veneer (thickness 6 cm). All the tops are in Grès Abitum Nero Rigato (1.2 cm thick); the tall units behind the island are Malt Oak veneer.
