

FINGERGRIP INVISIBLE | BEVELLED

KEY CUCINE

The various types of front on the **Strip** kitchen (design Nevio Tellatin) are all without handles: both the plain ones on the base units, finished in liquid metal with a soft-touch finish and in Mustang marble, and those for the tall units, in Canaletto walnut vertically ribbed at regular intervals. The working of the fronts of the drawers on the island unit is also interesting: the upper bevelled edges of the Mustang marble panels of the drawers create a one-block effect with the worktop in the same material, while just below they create a fingergrip; the groove in the middle is used to open both the small drawer and the deep pan drawer. The Canaletto walnut fronts, with a milled finish on the tall units, have a vertical fingergrip.

SCAVOLINI

A handleless front characterises the style of **Motus**. The base units are opened by a horizontal fingergrip created along the upper edge out of the thickness of the panel. For the tall units, the fingergrip is exclusively in the lower front, which is also used to open the upper one. As well as plain fronts, available with glossy, matt or decoratively textured finishes, Motus also offers a new interpretation of the traditional glass-fronted cabinet, which becomes an insert in the panel: a vertical band in the case of the tall units and a horizontal band for the base units. There is also a special mirror-finish glass finish.

SCAVOLINI

Caratterizza lo stile di **Motus** l'anta senza maniglia, che nelle basi è sostituita dalla presa orizzontale ricavata nello spessore del pannello, nella parte superiore. Per le colonne la presa è inserita solo nell'anta inferiore che consente di aprire anche quella superiore. Oltre alle ante lisce, proposte in laccato lucido e opaco e in decorativo con effetto materico, Motus offre anche una reinterpretazione della classica anta a vetro, che diventa un inserto nel pannello, ovvero una fascia verticale per le colonne e una fascia orizzontale per le basi. Speciale anche la finitura del vetro, realizzata a specchio.
